THE Honorable Lois Bloom
United States Magistrate Judge
Eastern District of New York
225 Cadman Plaza East
Brooklyn, New York 11202

DEAR Magistrate Judge Bloom

I Richard Richardson PRO SE CASE #
09-cv-4647 (arr) LB Here by write
you to let you and the court know
the Corporation Counsel LISA music Richardson
miss the 30 days deadline for my
new request on officer Sergeant
Lyndon Providence #19061 involved
an incident he was in and the file
was close because the victim
did not follow up on it, and plus
since 10/6/10 Lisa Richardson still
do not return my phone calls.

Richardson v. P.O. Providence

Calman Plaza Postoffice

et al. 09-cv-4647 (arr) b

P.O. Box 22886

Brooklyn NY, 11202

RECEIVED

SEP 10 2010

PRO SE OFFICE COUNSEL LISA M. Richardson

I Richard Richardson Plaintiff PRO SE
Hereby write to you to request on
discovery. The confidentiality disciplinary
file on Sergeant Lyndon Providence
Shield #19061 on who was ~~the~~^{the}
allegedly complainant involved in an
incident that was false because the
Victim did not follow up on the
incident. And also in writing
Why was Sergeant Lyndon Providence
Shield #19061 SILVER and not Gold
like an Sergeant Shield Supposed to be.
On the date of 10/14/09 the
Plaintiff Incident at the Jay Street
Station. Brooklyn NY. Reason why I
request because he had on a SILVER
Shield and not Gold Shield.

Respectfully Submitted

BROOKLYN, NY 11228

MAGNETIC RESONANCE IMAGING SCAN OF THE LEFT HAND

TECHNIQUE: Neutral/Sitting: Axial T1, Axial T2, Coronal T1, Gradient Echo Coronal,
• Sagittal T1.

INTERPRETATION: A surface marker was placed over the area of the proximal third metacarpophalangeal joint.

Exam demonstrates subchondral signal abnormality in the head of the first metacarpal. There are also marginal osteophytes.

Joint space narrowing is seen, with a small synovial effusion.

There is subchondral signal abnormality in the head of the first metacarpal. The finding may reflect arthritic changes. However, the possibility of a small subchondral fracture is not excluded. Correlation with radiographs is recommended.

The flexor and extensor tendons, and radial and ulnar collateral ligaments are intact. No soft tissue mass is identified. The neurovascular bundles are unremarkable.

IMPRESSION: SUBCHONDRAL SIGNAL ABNORMALITY IN THE HEAD OF THE FIRST METACARPAL, ASSOCIATED WITH JOINT SPACE NARROWING AND MARGINAL OSTEOPHYTE FORMATION, LIKELY REFLECTING OSTEOARTHRITIS, ALTHOUGH THE POSSIBILITY OF ASSOCIATED SUBCHONDRAL FRACTURE/INFRACTION IS NOT EXCLUDED. NO DISLOCATION, OR LIGAMENTOUS OR TENDON TEAR IDENTIFIED.

Sincerely,

Samuel Mayerfield, MD
